PRESS RELEASE

PointOne Names Staci L. Pies, Vice President, Governmental and Regulatory Affairs

Former Level 3 Counsel to Guide Company in VoIP Public Policy Role

AUSTIN, June 8, 2004 -- PointOne announced today that Staci L. Pies has joined PointOne as Vice President, Governmental and Regulatory Affairs. Ms. Pies will represent and provide legal and policy counsel for the company.

Pies has over 10 years of extensive experience in governmental, policy and regulatory affairs both within federal government and industry. Most recently, she served as Director, Federal Regulatory Affairs at Level 3 Communications, where she provided policy counsel to assist the company in launching its VoIP products.

Ms. Pies also brings extensive Federal Communications Commission (FCC) experience to PointOne. She was Deputy Chief of the Network Services Division and Senior Attorney in the Policy Division, both in the FCC's Common Carrier Bureau, where she was pivotal in proceedings promoting deployment of advanced information services.

"We are delighted that Staci has joined the PointOne team," said Sam Shiffman, Executive Vice President of PointOne. "Her tremendous legal, policy and regulatory expertise will guide PointOne through the critical public policy challenges facing our industry and the future of IP communications technologies, services and applications. She is renowned in the industry and throughout government as a focused and effective policy expert."

"PointOne is one of the most experienced and successful VoIP enhanced service providers in the industry," said Ms. Pies. "I am most impressed by its unsurpassed track record in providing innovation in IP and enhanced services. I am thrilled to join one of the industry's true leaders and I look forward to helping shape the policies that will further drive growth, capabilities and the ubiquity of PointOne and IP enabled communications."

About PointOne

Established in April 1998, PointOne is the largest VoIP network in North America utilizing all next generation technology with over 75% on-net coverage in the U.S.,

designed from the ground up to provide 100 % IP based applications and services.
